our available
applications

ATC Part Number: W600-TCM12NR

ATC PRODUCT/PROCESS HIGHLIGHTS:

- CORES FULLY DISASSEMBLED

- All components cleaned and inspected

- EXTERNAL HOUSINGS

- Cleaned, repaired, and painted

- RECERTIFIED BATTERY MODULES

- 100% cycle tested to determine capacity and state of health (SOH) relative to OE specifications
- Passed modules are graded by SOH to ensure balancing of the assembled battery pack
- Proper balancing of assembled pack ensures that each module shares an equal load for optimum battery performance and life

- ASSEMBLED BATTERY PACKS ARE END-OF-LINE (EOL) TESTED FOR

- Validates that all modules are balanced within the assembled pack
- Checks each modules internal resistance and voltage to confirm they are within specification
- Verifies function of the temperature sensors and the current sensor
- Performs diagnostic check on Battery Management System (BMS) to confirm proper function
- Checks to ensure that BMS software is configured for correct application
- Clears any stored Diagnostic Trouble Codes (DTC's)
